**Appendix 2:**

**You think that Saanenm<sup>o</sup>ser WAS NOT a suitable location for the Summer Institute. Why?**

DATA

CODE	VALUE
136511681	It was in the middle of nowhere

**Appendix 3:  
Comments:**

DATA

CODE	VALUE
136509552	Generally, keep it mostly as it is. Do NOT add scientific presentations. Choose a slightly less expensive location and provide childcare with the cash excedent + some wine? :-)
136510103	What do the students gain technically/non technically? Non-technically: ok. Technically : some really "external expert" opinion/assessment about posters could be useful.
136511681	Workshops where too ambiguous and without conclusions. The titles of the workshops look promising but [...] did not how to engage them. General information about conference room location and checking out time would be useful. I had to discover them by myself.
136513104	I wish wireless network connection were free of charge at the venue of the IM2 Summer Institute
136519759	No internet from the hotel, it's a shame!
136519913	The WIFI was awful. Didn't realize how important it was before now.
136520814	Excellent workshops!
136520977	Problems: No free WiFi, no free beer/wine, somewhat unclear goals in the workshop sessions. Strengths: Excellent opportunities for socializing & networking. Nice place, nice atmosphere & excellent organization!
136522021	Without going into babysitting, more info on practical things should have been given (WiFi, drinks at table at charge, check-out, buggage room,...). Moving people in room is difficult, Katherine failed in that field (instructions not clear enough)
136522617	career-relay was not very appropriate for the large number of people. Panel discussion rather boring, uninformative, unstructured.
136523028	The organisation was great. Thanks! I would give 9/10 for this Summer Institute. 10/10 if we had Internet access.

**Appendix 4:****What do you suggest for the next IM2 event (program, length, period of the year, location, etc):**

## DATA

CODE	VALUE
136509209	2 days would be enough
136510698	I hope next year IM2 will be held at the same location as this year.
136511207	Please have a less straining trip. Closer/reachable easily by train. Include more technical programs, include more (outside) industry representatives/experts for talks and discussions. Poor chance to interface with outer world.
136518868	We should have some free wireless and a little bit more time for breaks.
136519263	Location: Hawai, next to the beach
136519468	It would be good to have wireless access. A slightly bigger town where other opportunities for night drinks or social activity would be a plus.
136519913	I hate poster sessions. They're an excellent way to prevent the students finding out what their colleagues are doing. I think that there should be oral presentations exclusively.
136521752	3 days, in September, somewhere near the snow mountains.
136522021	Roles games, group work alternated with presentations
136522617	Team-building inspired program (games, etc)
136523028	For the next IM2, I would suggest being sure that there is WiFi Internet access for everyone.
136523676	Tutorials on multimedia processing. Location: Ticino, CH
136526087	Similar at this year
